PROFILE

Cloud Engineer experienced in designing, deploying, and managing scalable cloud infrastructure and cloud-native solutions. Skilled in **Microsoft Azure**, **cloud administration**, **infrastructure automation**, **networking**, **security**, **virtualization**, and enterprise **cloud migration**. Focused on building **reliable**, **secure**, and **cost-efficient** cloud environments through **automation**, **monitoring**, and **infrastructure optimization**.

WORK EXPERIENCE

Capgemini — Cloud Analyst Engineer

Mumbai, India | Sep 2025 – Present

Project — Volvo

Jun 2026 – Present

- Delivered **L2 support for 150+ Azure VMs across 19 subscriptions**, maintaining **99.9% infrastructure availability** through proactive monitoring, incident management, troubleshooting, and SLA compliance.
- Administered **Azure VMs, Resource Groups, Functions, App Services, Containers, and Service Principals**, including **Linux administration, RBAC, secret rotation, disk/storage expansion, patching, and resource management**.
- Managed **Azure SQL Database, PostgreSQL, and DFSQL**, performing **provisioning, restoration, scaling, configuration, and connectivity troubleshooting** for production environments.
- Supported enterprise data and integration platforms through **ADF pipelines/triggers, MQ queues, Informatica, Qlik Replicate, IBM CDC, Power BI, WhereScape, and SHIR**, while handling **DR, VM restoration, quota management, IP utilization, and infrastructure health monitoring**.

Project — MARTA (Metropolitan Atlanta Rapid Transit Authority)

Dec 2025 – May 2026

- Migrated **76/108 on-premises VMware VMs to Azure VMware Solution (AVS)**, achieving **70% migration completion** by designing and configuring VMware HCX components including **HCX Connector, Site Pairing, Network Profiles, Compute Profiles, and Service Mesh**.
- Performed **end-to-end VM migrations** using **AVS, VMware HCX, vCenter, and Azure Migrate**, selecting **Bulk Migration, HCX vMotion, or Replication-Assisted vMotion** according to workload criticality and downtime requirements.
- Led **migration cutovers, maintenance windows, and post-migration validation**, resolving **production issues**, coordinating with client stakeholders, and securing sign-offs while minimizing workload downtime.

PROJECTS

AI-Powered Multi-Cloud Cost Intelligence Platform · Azure · AWS · GCP · Node.js · PostgreSQL · Redis · Docker · AI · [GitHub](#)

Jan 2026

- Built an **AI-powered multi-cloud FinOps platform** integrating **Azure, AWS, and GCP** cost data for centralized monitoring, anomaly detection, forecasting, and automated optimization recommendations; targeted **25–35% potential cloud-cost savings** based on research-backed optimization scenarios.
- Engineered a cloud-cost analytics pipeline using **Node.js/TypeScript, PostgreSQL, Redis caching, Docker, and AI agents** to identify idle resources, over-provisioning, storage inefficiencies, commitment-discount opportunities, and scaling issues; modeled **\$2.8M annual savings on an \$8M cloud budget** in enterprise optimization scenarios.
- Developed **AI-driven root-cause analysis and actionable cost recommendations**, validating the platform on **30 cost records / \$48.8K analyzed spend**, generating **\$8.8K estimated optimization opportunities** and **\$105K+ annualized savings** with **96% reported AI confidence**; developed the application using **prompt-driven engineering with Claude Code**.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Jan 2021 – Jul 2025

B.Tech, Computer Engineering, Honors in Intelligent Computing | **CGPA: 8.57**

Narayana e-Techno School — HSC (Class XII), **91.82%** | Notre Dame School — CBSE (Class X), **90.00%**

TECHNICAL SKILLS

Cloud & DevOps: Azure/Azure DevOps, AWS, GCP, Docker, Kubernetes, Linux, Terraform, Claude Code, Git/GitHub, Kafka, Power BI.

Languages: Java, Python, C/C++, SQL, MongoDB

RESEARCH PUBLICATIONS

- Automated Feature Extraction From Version Control Artifacts in GitHub Repositories** — *International Conference on Engineering Technology Science and Management (ICETSM) 2024 (Accepted)* [\[Link\]](#)
- Hybrid Predictive Modeling for F1 Race Outcomes: Random Forest & Graph Neural Networks** — *ComSIA 2025, Proceedings of ICCSIA, Springer* [\[Link\]](#)
- Dynamic Neural Style Transfer for Artistic Image Generation using VGG19** — Accepted for presentation, ICRAECA 2025 (IFERP), Jan 2025 [\[Link\]](#)

CERTIFICATIONS

Azure Administrator Associate ([AZ-104](#)) · Azure AI Engineer Associate ([AI-102](#)) · Azure Fundamentals ([AZ-900](#)) · Azure Data Fundamentals ([DP-900](#)) · Azure AI Fundamentals ([AI-900](#))
